Dear Parents of Children entering Kindergarten:

It is with much anticipation that we await your child's entrance into Kindergarten this fall. Hudson City School District school health services are provided by Akron Children's Hospital. Our overall goal is to ensure that children are healthy and able to attend school.

The following forms are needed for school entry:

1. Current **Immunization Record**, completed by parent or physician, **REQUIRED AT REGISTRATION**. Please bring the record even if your child has not had the final boosters yet. We can make a copy if you have the original. State of Ohio health law requires the following immunizations for school entry:

DPT, DTaP	5 doses
Polio	4 doses
MMR	2 doses
Hepatitis B	3 doses
Varicella	2 doses or documented date of disease

Please note: Immunizations must be completed within 14 days of starting school, or your child may be excluded from attendance by the principal. The Summit County General Health District provides immunizations and can be reached at 330-375-2772 for information on their programs

2. **Physical Examination**, completed by the physician at the next yearly exam. Immunizations obtained over the summer can be attached to this form.
3. **Oral Assessment** (dental report) can be completed at the next visit.

It is encouraged to have check-ups completed before August to ensure your child is in the best possible health to start school. The physician and dental reports can be mailed to Evamere School, 76 N. Hayden Pkwy., Hudson, over the summer, or faxed to the school at 330-653-1234

In addition, if your child has a medical condition that may need intervention at school, i.e. asthma, food allergies, medications, etc., please call the school nurse so that accommodations can be arranged.

We look forward to having your child at Evamere next year.
